
About This Game

Once arch enemies, the US and Russia abandon their space race and unite their forces in the face of impending alien attack. Combining to form the elite International Space Defence Force, they recruit you to help lead resistance, before total devastation is unleashed on the human race.

The solar system is at war. Take command.

Battlezone: Combat Commander remasters FPS-RTS classic Battlezone II with slick new visuals, brand new achievements, Steam Workshop support and much more!

Fight across 24 intense missions, over 6 exotic living worlds, scavenging the battlefield for crucial bio-metal used to create powerful units, towering defenses, and vital facilities.

COMMAND A BATTALION

Control of over 30 unique unit types, from lethal tanks and tough ground units, to towering walkers and relentless air-support, and face off against the enemy in intense first-person combat.

ADVANCED AI

Units learn and improve as they gain combat experience - new units fight like recruits, while experienced units are a lot more effective in combat, using strafing manoeuvres, choosing weapons to suit the situation, or even retreating when necessary.

REMASTERED VISUALS

Experience Battlezone: Combat Commander like never before, with an all new DX11 renderer, shader based rendering, and a completely retextured and upscaled terrain.

GO HEAD TO HEAD

Invite your friends for a cross-play multiplayer experience, including the classic Deathmatch mode, and a co-operative mode 'MPI' where players must work together to win by managing their offence, defence, and scrap collection.

MOD SUPPORT

Enjoy unique community generated content with support for mods, such as new singleplayer and multiplayer map mods, new vehicles, HUDs, assets, custom scripts and much more. [7ad7b8b382](#)

One of my favorite games of all time coming back to life!

Some of the issues in the original game are present in the HD remaster, such as the AI ineffectively piloting their crafts and the general recklessness of scavs. There are some bugs, most of which have work-arounds, but they hardly detract from the gaming experience.

This is a truly unique and special old school game that has aged extremely well. Not even other FPS and RTS hybrid games like Natural Selection II can compare. All these years later I enjoy it just as much as I did back then.

I would highly recommend this game for anyone experienced with shooters and real time strategy games looking for something different. The economy is unique and much of the strategy also relies on your dogfighting abilities!. This game is just as awesome as I remember. I played this game 15 years ago or so when I was a young warthog and I was as excited as it gets when I found it recently on Steam. It's a fun little game. You can take your time and build a big base with a bunch of ships and raze the enemy's base to the ground. Or you can build just enough of a force to defeat the enemy to see how quickly you can beat them. Great stuff!
