## About This Game

Magicka is a satirical action-adventure game set in a rich fantasy world based on Norse mythology. The player assumes the role of a wizard from a sacred order tasked with stopping an evil sorcerer who has thrown the world into turmoil, his foul creations besieging the forces of good.

Players will be able to combine the elements to cast spells, wreaking havoc and devastation on the minions of darkness. They will also be able to team up with friends and fight their way through the campaign, or test their skills in the magickal arts through other challenging modes.

In Magicka, up to four players take on a grand adventure to save their world from certain doom using a fully dynamic spell system. The adventure mode takes the players across three different levels, ranging from the lush forests of mountain valleys to the frozen halls of the Mountain King where wits and creative thinking are the keys to victory.

In the unlockable hardcore challenge mode, players fight off waves of enemies to earn their place on local and online leaderboards.

Used to be good when it worked, now it doesn't seem playable for anyone. Do not buy..

<https://steamcommunity.com/games/593110/announcements/detail/1808664240333155775>. Boycotting Paradox Interactive for latest greedy actions taken by them.. This would be a 9/10 if it didn't crash every five minutes. Brilliant game but cannot be recommended when crashes occur more frequently each time we try to play. when it crashed at the end of a level at least progress could be made but now often don't even get past the login screens

---

Game "was" fun at one point. But now is riddled with bugs and crashes. It's an amazing feeling to have the game crash at the end of each level.

The game has been abandoned in a broken state that at some points is next to unplayable. Avoid. DO NOT GET THIS GAME,

Yes it WAS a wonderful game to play single player or coop, but the devs put out all these "updates" to test the game out for magicka 2, rendering this game useless, between crashing and bugs, they essentially f\*\*\*\*\*d this game up, i suspect so they can force you to fork out more cash for magicka 2
